Review

while Statement

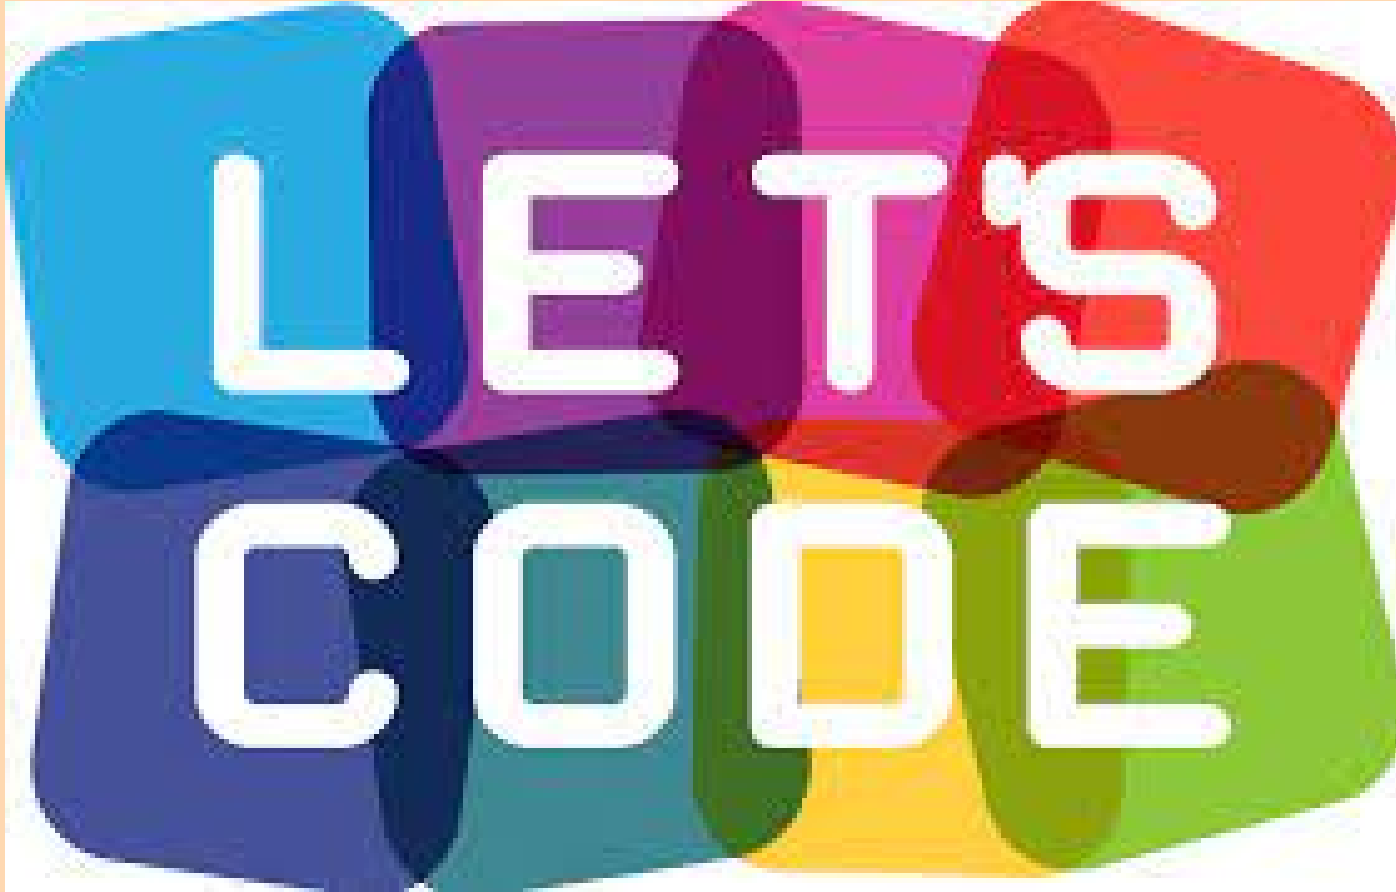

break Statement

[]; std::array

Overview

for Statement

Nested Loops

min-array.cpp palindrome.cpp stars.cpp

primes.cpp selection-sort.cpp

Min of an Array

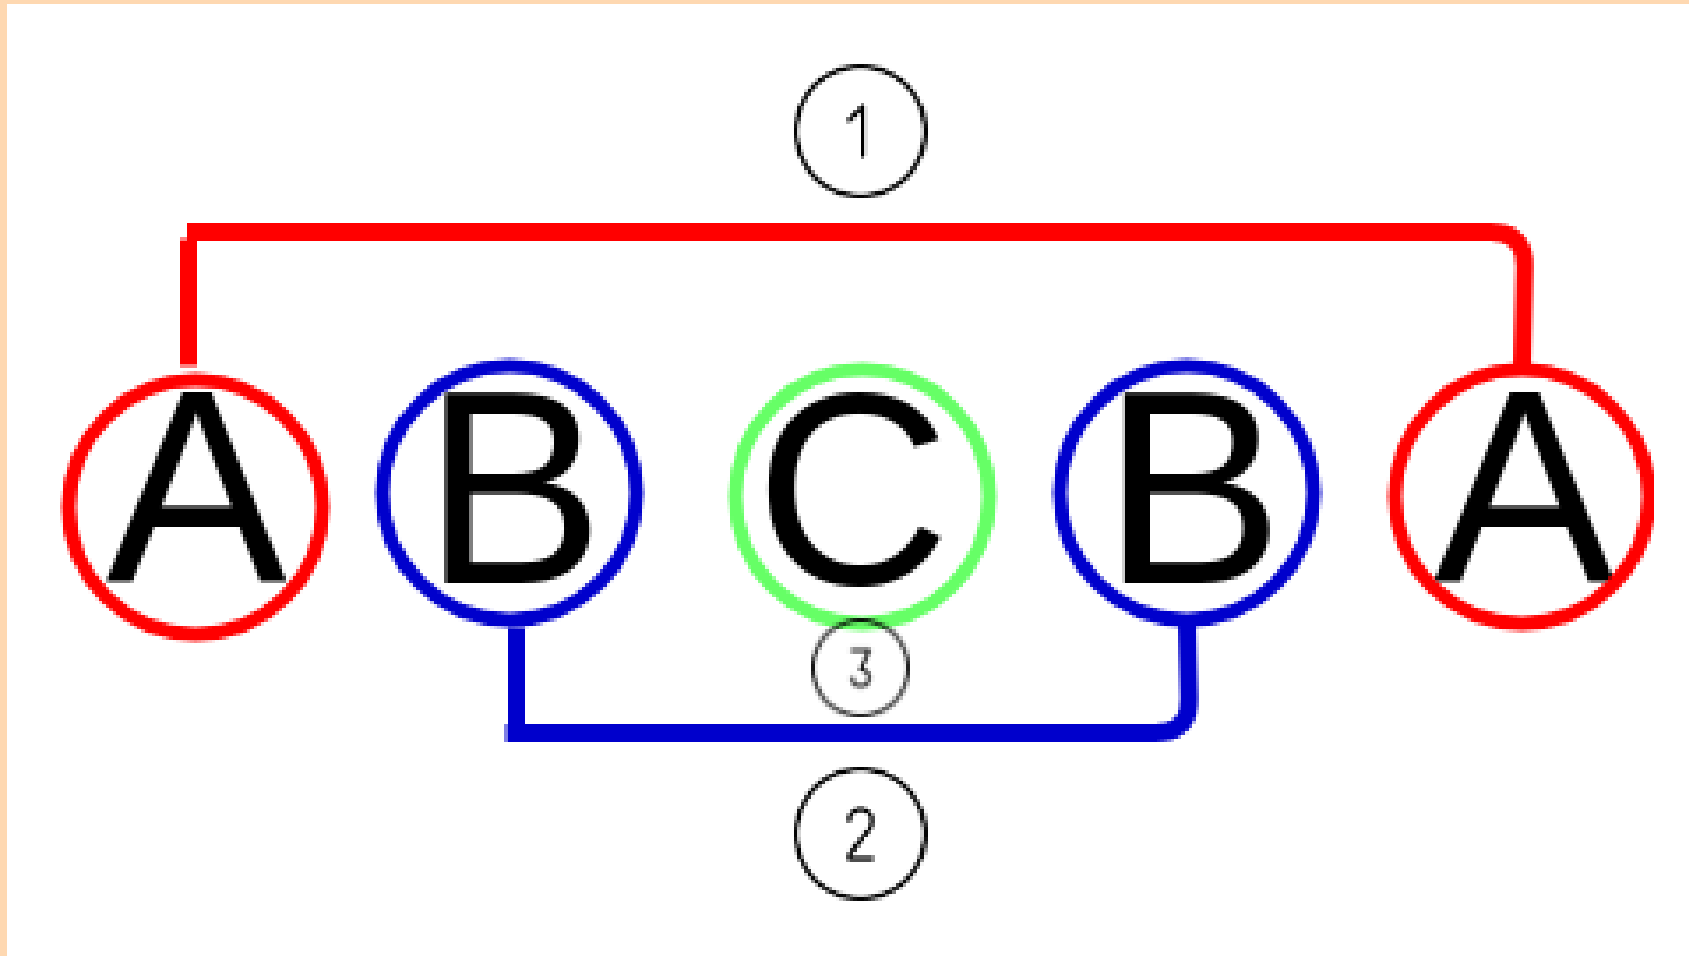

minimum

$\text{min}(23, 56, 19, 11, 78) = \text{min}(\text{min}(\text{min}(\text{min}(23, 56), 19), 11), 78)$

```
for (init-clause; cond-expression;  
iteration-expression) loop-statement
```

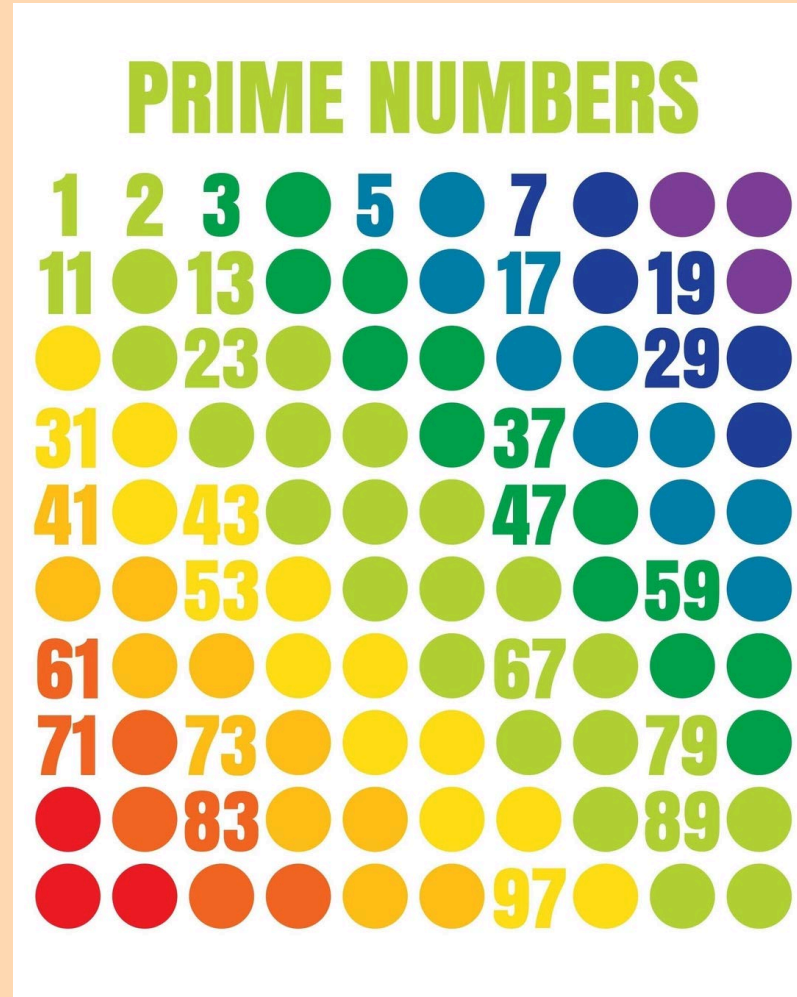

Palindrome (for version)

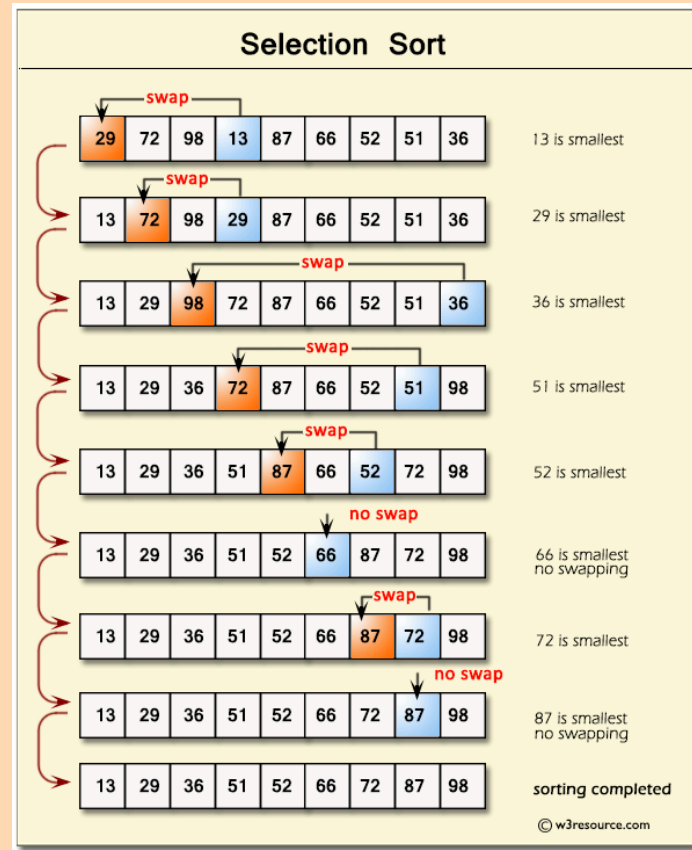

Stars Pyramid

Prime Numbers

Selection Sort

Find the minimum in `[i .. n-1]`, swap with `numbers[i]`.
