Overview

for Statement

Nested Loops

**<mark>min-array.cpp palindrome.cpp
stars.cpp</mark>**

min of an array

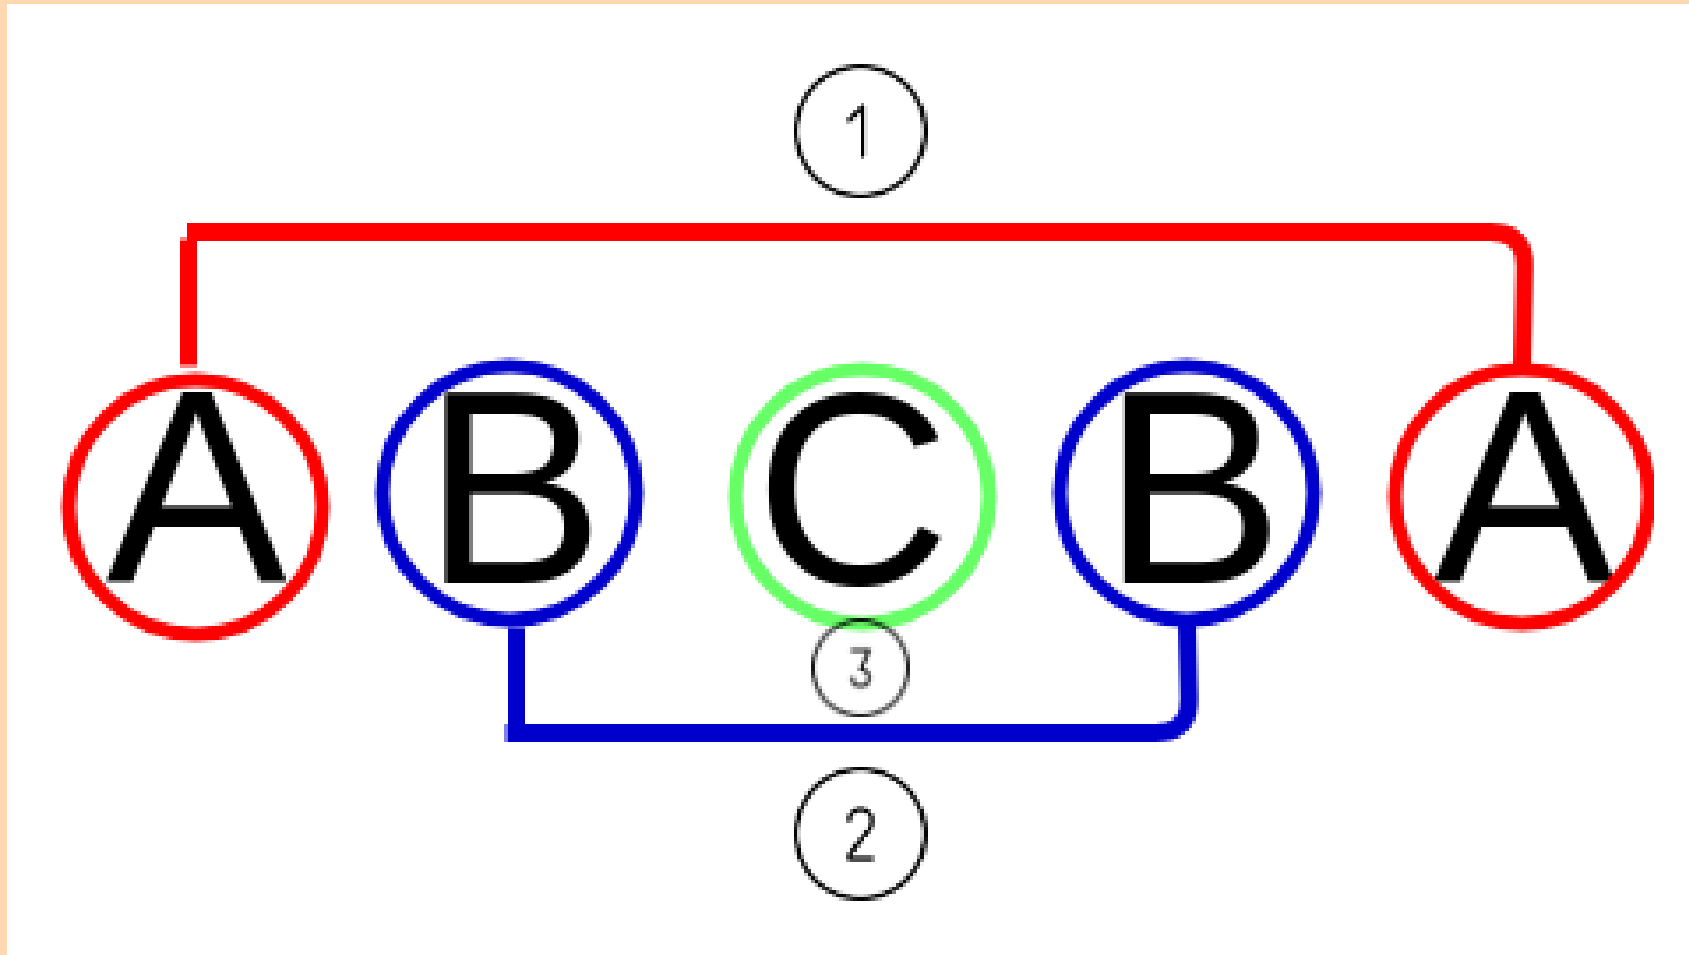

minimum

$\text{min}(23, 56, 19, 11, 78) = \text{min}(\text{min}(\text{min}(\text{min}(23, 56), 19), 11), 78)$

```
<code><font color = yellow>for (<font  
  color = red>init-clause</font>; <font  
  color = blue>cond-expression</font>;  
    <font color = cyan>iteration-  
      expression</font>) loop-  
      statement</font></code>
```

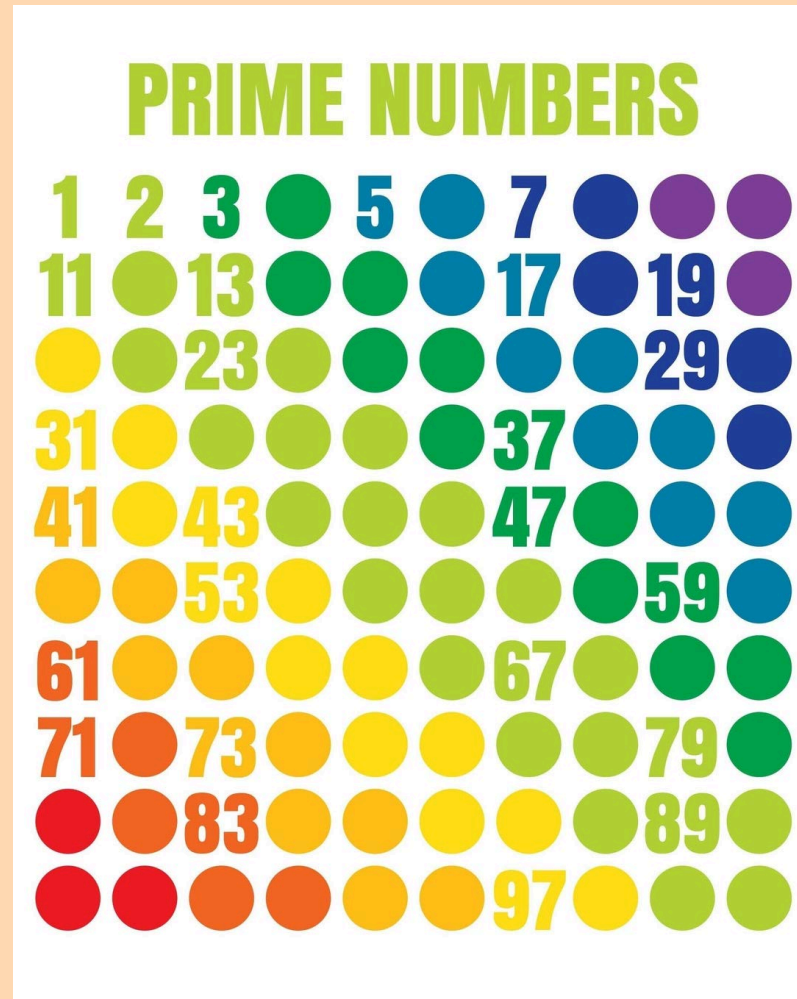

Palindrome (for version)

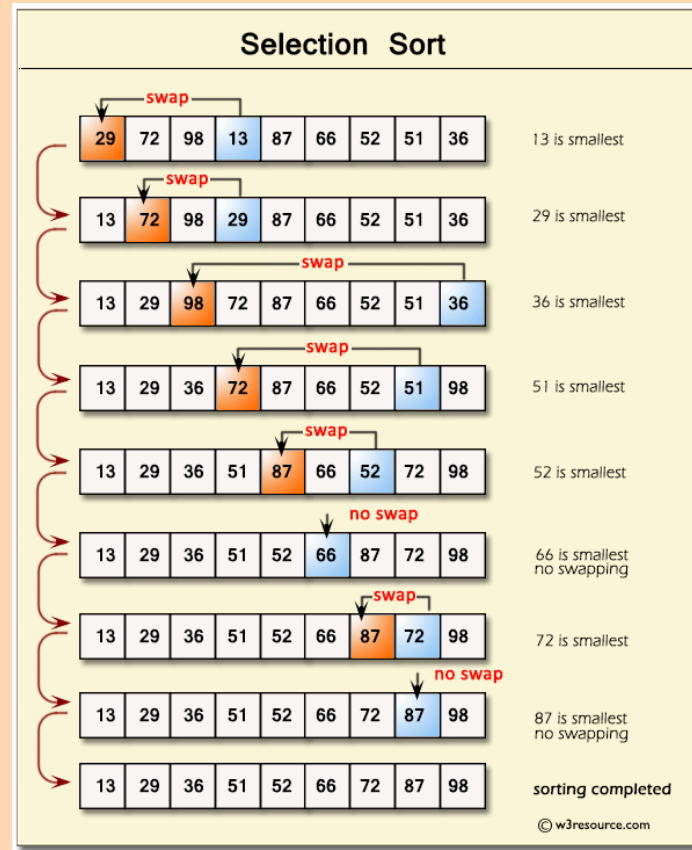

Stars Pyramid

Prime Numbers

Selection Sort

Find the minimum in `[i .. n-1]`, swap with `numbers[i]`.
